Matías Agustín Delega

Independent Game Developer and Game Designer

Buenos Aires, Argentina | matiasrigozzi@gmail.com

GitHub: logmat-code

Profile

Independent developer working as LOGMAT on Unity games for mobile and browser platforms. My work combines game and level design, hands-on playtesting, UI feedback and iteration with AI-assisted development. I bring a background in music production, sound design, teaching and creative project coordination.

Skills

Unity • Game and level design • Gameplay prototyping • Mobile UI and touch controls • Manual QA and regression reporting • Android and WebGL release workflows • Git and GitHub • AI-assisted development with Claude Code and Antigravity • Ableton Live • Sound design, mixing and mastering

Game and Software Development Experience

Independent Game Developer and Designer | LOGMAT

Early 2025 – Present

- Define gameplay mechanics, progression, level requirements and visual direction; turn playtesting and tester feedback into prioritized fixes and acceptance criteria.
- Direct iterative implementation with AI development tools, review playable results and maintain project versions in GitHub.
- Prepare Android and browser releases, including store-page content and promotional materials; review touch controls, screen readability and mobile performance.

Projects in Development

Cursed Harvest Unity survival game developed for the Synty Spooky Jam. Work covers the harvesting loop, arena and boss progression, mobile adaptation, playtesting and Android release preparation.

My Shadow Quit The Last Flame Unity puzzle-platformer for AI Browser Game Jam 5. Direct the torch and shadow mechanics, puzzle progression and visual iteration; prepare the WebGL version and itch.io presentation.

1% Battery Mobile arcade runner. Iterate on zone progression, obstacle readability, character feedback and UI using direct playtesting and tester reports; prepare Android store materials.

Neon Drift Mobile arcade drifting game. Work on handling and drift feedback, progression, interface and environment readability through iterative playtesting.

Gravity Switch Unity mobile arcade project. Review gameplay presentation, player readability and interface behavior; maintain project versioning and Android release work.

Final Station Unity narrative adventure. Test chapter flow, puzzles, inventory, save slots and touch controls; identify regressions and define repair criteria for mobile builds.

Necromancer's Deck Unity card-based combat project. Develop the design direction and review card interactions, enemy behavior, combat feedback and menu usability.

TrackDoctor Audio-analysis application using Flutter, FastAPI and PostgreSQL. Coordinate AI-assisted development and review work on authentication, audio analysis, subscriptions and release readiness. In development.

Additional Project Work

The Floor Is Dying Independent game project with original audio-production and visual-asset work, maintained in GitHub.

Memory Ghost Narrative investigation game in preproduction. Develop case structure, evidence and deduction systems, production documentation and the direction for a 2D pixel-art vertical slice.

Flesh Circuit 2D metroidvania concept for Metroidvania Month Finale. Define interconnected exploration, ability-based progression and a focused production scope. Design stage.

Recoil Express Roguelite design work covering upgrade rarity, capped stacking, achievement unlocks, shops, healing rules and reward selection. Design stage.

Don't Follow My Voice First-person narrative horror concept. Define evidence-based puzzles, contradictory voice instructions and consequential choices. Design and implementation planning.

The Last Train Mobile strategy concept combining tower defense, deckbuilding and roguelite progression around a moving train. Specify a portrait-first layout and resource loop. Design stage.

MAAG The Game Unity game concept with movement and rhythmic dash mechanics. Define movement, combat and technical requirements. Design stage.

Additional Professional Experience

Co Founder and Co Owner | Butterfly Records

July 2021 – Present

Coordinate releases and events, communicate with artists, venues and suppliers, and manage promotion and visual identity.

Founder and Owner | Reptile Sounds

May 2022 – 2025

Managed record releases, artist communication, demo submissions, DJ promotion, social media and visual identity.

Private Music Production Instructor | Independent

July 2020 – 2025

Provided individual instruction in Ableton Live, composition, arrangement, sound design, mixing and mastering, with a focus on electronic music.

Music Production Instructor | Tekgen Academy

July 2022 – July 2023

Taught Ableton Live, composition, arrangement, mixing, mastering and sound design, adapting lessons to each student's workflow.

Education and Training

Game Development with Unity | UGameStudios 2025 – Present. Course in progress.

Advanced Music Production | ARJAUS 2019.

Graphic Design | Instituto Argentino de Computación 2019.
